

Inventory Intelligence

Features + Benefits

- + Benefit from one of the most powerful Inventory engines on the market within Sympac's Retail Management Solution.
- → Sympac's huge range of standard Inventory functions, plus retail intelligence tools building on your own store data, gives you a powerful edge for your merchandising.

Suggested Ordering

- Suggest an order for Warehouse, Agency & Direct, Suppliers.
- + Add items into the TBO (To Be Ordered) system for editing and purchase order creation.
- Sort and view suppliers to establish if suppliers minimum order values have been met.
- Saves staff time spent on scanning products into PDAs and PDEs and possible overstocking.
- Eliminates the need to create manual purchase orders for stock.

- → Uses Stock On Hand and Stock On Order to establish if an order is required.
- + Suggested Order quantities are based on rate of sale.
- + Suggested orders can be given to reps to review and check stock on hand.
- + Ability to set up <u>order</u>
 <u>tables</u> for suppliers,
 seasonal products (for
 example watering), and
 for groups of products (for
 example paint).

SPI Reporting

SPI = Stock Productivity Index, which is a measure of how efficiently the stock is performing

- Quickly identifies products that are performing poorly — for fast & accurate decisions with merchandising strategy.
- Can be run as a summary and then drill down to specific products by various sorts, for example — by bin location.
- + Identifies products where stock on hand is too high for the rate of sale.

- Identifies products which have a <u>low gross profit</u>.
- ► Identifies products with<u>low</u> <u>stock turns</u> — and also those <u>fast selling products</u>with high stock turns.
- → Gives you the information you need instantly to make your stock more productive.

Stock Replenishment

- + Replaces stock sold for a given date range
- Adds products that need to ordered into the TBO system
- + Used for new stores who may not have sales history or Min Max quantities set
- Saves ordering time as order is suggested and added to the TBO system
